

Far from Home

Ladytron

We wave bye bye to the city
Its rarity, and energy
From the East is how we'll come
Just like the sun as it breaks the canopy

The weaponry, ideas, flames, and reverie
For when the rays cut through the calm, with no alarm
Just a sense of something

On the way
We're okay
Safe and sound
Far from home

South is where we'll be
Unfamiliar and free
In the West is where we'll rise
Just like the smoke as it starts to hurt our eyes

Their weaponry, their lead and steel, and verdigris
To protect what they don't know, so far below
They think we got caught

A world away
We're okay
Safe and sound
Far from home

On the way
We're okay
Safe and sound
Far from home
