

# Let It Fall

Laleh

There's a space between your words love  
I know, I know something's wrong  
Fading out, I see the sun go up  
I still feel cold

Nothing learnt if I just blame you  
How low can I go  
Heading out before the clouds come  
I still feel small

So let it fall, let it all fall down  
Let me see what it falls down to  
Let it fall, let it all fall down  
Let me see what it comes down to

Let it fall, all fall down  
Let me see what it comes down to  
Let it fall, all fall down  
Let me see what it comes down to

There's a space between my thoughts love  
I know, I know something's up  
Fading out I see the sun go up  
I still feel cold

Nothing matters since you left me  
How long are you gone  
Should have known right when I met you  
I would end up alone  
So let it fall, let it all fall down  
Let me see what it falls down to  
Let it fall, let it all fall down  
Let me see what it comes down to

Let it fall, all fall down  
Let me see what it comes down to  
Let it fall, all fall down  
Let me see what it comes down to

Let it fall, all fall down  
Let me see what it comes down to
