

Many Lights

Laleh

What good could a candle do
Here in the darkness
Will it make a difference
This little candle light in my hand
But looking out, out of the window
There's thousand of candles
We're not alone
The world is full of heroes
There's a lot of lights, a lot of lights out there
There's a lot of lights, a lot of lights out there

Ah
No matter what, no matter what
There's a lot of lights, lot of lights

And why should I even care
It's getting colder
And maybe it's over
And what will a little flame
Ever change
But looking out
Out in the distance
There's thousands of candles
A lot of us
Still hope for something better
There's a lot of lights, a lot of lights out there
There's a lot of lights, a lot of lights out there

No matter what, no matter what
There's a lot of lights, a lot of light

It's easy, it's easy
Easy to forget it, easy to forget
Here in the darkness, here in the darkness
There's a lot of lights, a lot of light, a lot of light

No matter what, no matter what
There's a lot of lights, a lot of light, out there

No matter what, no matter what
There's a lot of us, lot of light, you could call a friend

A lot of us hope for something better
There's a lot of light, a lot of lights out there
There's a lot of light, a lot of lights out there
