

# Good With It

LANCO

Long day, work sucks, baby, I know it  
But my truck is gassed up and ready to go  
If you're up, then I'm down  
If you're good, then I'm good with it

We're gettin' lost out in the country  
I found us a spot that's right on the money  
I'm missing the view watching you  
But you're good with it

With that gold sun sinking  
And this cold one I'm drinking  
Got me thinking that life don't get no better than this  
There's a slow song playing  
And my tailgate's waiting  
And I hope that you know that you go so  
Good with it  
So good, so good, so good, so good  
So good, so good, so good  
Yeah, I hope that you know that you go so good with it

Yeah, you and me are fire and smoke  
But we're meant to be like whiskey and coke  
And this night is just right  
But your kiss would go good with it

With that gold sun sinking  
And this cold one I'm drinking  
Got me thinking that life don't get no better than this  
There's a slow song playing  
And my tailgate's waiting  
And I hope that you know that you go so  
Good with it  
So good, so good, so good, so good  
So good, so good, so good  
Yeah, I hope that you know that you go so good with it

Yeah, with that gold sun sinking  
And this cold one I'm drinking  
Got me thinking that life don't get no better than this  
There's a slow song playing  
And my tailgate's waiting  
And I hope that you know that you go so  
Good with it  
So good, so good, so good, so good  
So good, so good, so good  
Yeah, I hope that you know that you go so good with it

So good, so good, so good  
So good, so good, so good  
So good, so good, so good
