

Save Me

LANCO

Trouble, trouble finds me
No matter where I go
In a New York dive
L.A. high rise or a Tennessee patio
People, people tell me
But I already know
There's a girl out there
Some town somewhere
On the straight and narrow
Don't you know that I saw you walk in this place
Devilish grin and an angel face
You could be my saving grace

So, baby, please
Come a little bit closer
Till the space between
Is gone and the night is over
I've been lost but I found you
You could be the someone to
Pull me close tonight make me believe
That you could save me

I can, I can feel it
I think you know what I mean
My addiction to this friction
Is like the skin against your jeans
Tell me, tell me if I'm not the only one
In this place that needs some savin'
Before the night is done

Then, baby, please
Come a little bit closer
Till the space between
Is gone and the night is over
I've been lost but I found you
You could be the someone to
Pull me close tonight make me believe
That you could save me, save me, yeah

Don't you know that I saw you walk in this place
Devilish grin with an angel face
You could be my saving grace

So, baby, please
Come a little bit closer
Till the space between
Is gone and the night is over
I've been lost but I found you
You could be the one to
Pull me close, tonight make me believe
That you could save me
You could save me
You could save me
