

Dead Inside

LANDMVRKS

I remember being drowned into water
It's cold and it's warm my head is burning like fire
Fuck that
I cannot fight with a ghost
We slowly turned ourselves into what we hated the most
I keep my feet on the ground
I'm lost, but I'm trying to find my way to the crowd
Goddamn
Every person I know, faking everything
But you cannot hide emptiness within your smile

Facing reality, And never been so blind
And my worst enemy, can feel it down my spine

Cause you can be like all the others
And never look around the corner
Don't want be like them, but I can't save you all the time
Everything is getting colder
Feels like the whole world on my shoulders
Yeah, all that we see outside is just a sign
That we're all dead inside

Sinking deeper and deeper
I can feel the pressure
But I can't feel any fears, yeah
Feels like everyone is sleeping
Buried their feels because they're afraid of talking

Cause you can be like all the others
And never look around the corner
Don't want be like them but I can't save you all the time
Everything is getting colder
Feels like the whole world on my shoulders
Yeah, all that we see outside is just a sign
That we're all dead inside

I can feel it coming, crawling my spine
I can't fake it now I better be blind
They surround me and I have no place to hide
But in the end we're all dead inside

Cause you can be like all the others
And never look around the corner
Don't want be like them but I can't save you all the time
Everything is getting colder
Feels like the whole world on my shoulders
Yeah, all that we see outside is just a sign
That we're all dead inside
