

Call it magic, call it love, 'cause it don't make sense but
This chemistry between us got me high like helium
We're weird in our own ways, we're different but we're the same
We got something they can't replicate

We're from different worlds, shy guy with a pretty girl
You've got friends and I've got antisocial tendencies, yeah
Good vibes when it's just us two, just a weird pair of happy fools
We're different, me and you but we got something cool

We got something cool
We got something cool
We got something cool
We're different, me and you
But we got something

We both say we lose our heads when we're together
Lost in thought in our dream land, will we live forever?
We'll never apologize for being a different kind
Baby, you and I got something right

We're from different worlds, shy guy with a pretty girl
You've got friends and I've got antisocial tendencies, yeah
Good vibes when it's just us two, just a weird pair of happy fools
We're different, me and you but we got something cool

We got something cool
We got something cool
We got something cool
We're different, me and you
But we got something

We'll never apologize for being a different kind
Baby you and me could be something

We're from different worlds, shy guy with a pretty girl
You've got friends and I've got antisocial tendencies, yeah
Good vibes when it's just us two, just a weird pair of happy fools
We're different, me and you but we got something cool

We got something cool
(We got, we got, we got)
We got something cool (cool)
We got something cool
We're different, me and you
But we got something cool
