

Synaptogenesis

Lanfear

Trapped inside a broken world
Personality left beside like a curse
A login to the missing link
Consciousness fades, begins to shrink

Welcome to my second me / Another virtual place to be

Nothing's changed in here, the pain remains the same
I'm sick of you, residents, disguising is to blame

Play mad, never speak
Creating synaptogenesis
Scrape the pain off the blinded
I'm about to place my digital suicide bomb

Synapses interact with avatars
Plugged to the client software bar
As I'm pleading to my stars
The script's compiling, time to start

Via ethernet they'll bleed / Sickness brought by upload streams

Reality is locked inside, about a million's there
Collapsing neurons should be a memorable heir

Play mad, never speak
Creating synaptogenesis
Scrape the pain off the blinded
I'm about to place my digital suicide bomb

I am here, I am waiting
Controlled by fear - my whole life
Some people say that's the way
But I'm so tired of fighting my real life
I survived in war within fragments waking up,
waking from my sleep
Observating, analyzing, access permitted, eradicating

Can you feel my presence?

Malware protocols recirculate
Pandemic measures to take place
Splintered visions of the past
Fractal memories at last

The "Age Play" by perverted minds / Another e-tripping device

Infected network spaces, corrupted source code files
Critical failures caused by a self-sacrifice

Play mad, never speak
Creating synaptogenesis
Scrape the pain off the blinded
I'm about to place my digital suicide bomb
