

# Make Me Forget

LANY

You are a miracle  
And you almost make me wanna believe  
I know I'm cynical  
Baby way too much has happened to me

Caught in the aftermath  
Watching one more year go up in flames  
You brought me out of that  
You're my little sweet escape

Is this magic?  
If it's not then how  
Did this happen?  
Can't work it out

You make me forget  
Every night before I knew your name  
Every thing that ever caused me pain  
You make me forget  
Every day would always be the same  
I don't eat, don't sleep, don't pray  
You make me forget  
All the memories of love before  
That dance around my head  
It's like my heart's never been built up then ripped right out of my chest

You make me forget

I could just watch you move  
An effervescent dream  
I swear you can float  
So undeniably  
Fucking obsessed with you I'm UFO

Is this magic?  
If it's not then how  
Did this happen?  
Can't work it out

You make me forget  
Every night before I knew your name  
Every thing that ever caused me pain  
You make me forget  
Every day would always be the same  
I don't eat, don't sleep, don't pray  
You make me forget  
All the memories of love before  
That dance around my head  
It's like my heart's never been built up then ripped right out of my chest

You make me forget  
You in that little black dress  
And the way that it hit the floor  
Ooh I've been all around the world  
But it's you I was looking for

I would hold your shadow in my arms

If it's the closest I could get  
Now I'm holding onto every word  
Like I believe in promises

You make me forget  
You make me forget

You make me forget  
Every night before I knew your name  
Every thing that ever caused me pain  
You make me forget  
Every day would always be the same  
I don't eat, don't sleep, don't pray  
You make me forget  
All the memories of love before  
That dance around my head  
It's like my heart's never been built up then ripped right out of my chest

I'll never forget  
You in that little black dress  
And the way that it hit the floor  
Ooh I've been all around the world  
But it's you I was looking for

I would hold your shadow in my arms  
If it's the closest I could get  
Now I'm holding onto every word  
Like I believe in promises

You make me forget
