

# Sugar & Cinnamon

LANY

Tattoos in Tokyo, weekends in Mexico  
Still haven't seen the pyramids or the Rolling Stones  
Black Harley Davidsons, sugar and cinnamon  
Pick up the pieces of my heart, fall in love again  
When I'm in my head  
And feel like I got nothing left  
It's easy to forget

There will be days  
You can't catch a break  
The sun is stuck behind the clouds  
There will be times  
When you lose your light  
But don't you let it get you down  
We're here right now  
We're here right now

Summertime innocence, learn how to kiss in French  
Stay up all night and watch the stars fade at 6 AM  
And when I lose the high  
I know it's OK to cry  
Everybody does sometimes

There will be days  
You can't catch a break  
The sun is stuck behind the clouds  
There will be times  
When you lose your light  
But don't you let it get you down  
We're here right now  
We're here right now

When I'm in my head  
And feel like I got nothing left  
It's easy to forget  
That life is such a gift

There will be days  
You can't catch a break  
The sun is stuck behind the clouds  
There will be times  
When you lose your light  
But don't you let it get you down  
We're here right now  
We're here right now  
We're here right now  
We're here right now

Oh yeah, tattoos in Tokyo, weekends in Mexico  
Still haven't seen the pyramids or the Rolling Stones  
Black Harley Davidsons, sugar and cinnamon  
Pick up the pieces of my heart and fall in love again
