

# Battles

La'Porsha Renae

Some days, it feels like you could run a million miles  
Some days, you feel like you can't move  
Some days, it feels like you could start a wildfire  
Some days, the fire's burning you

Just don't look down  
Living ain't always easy  
Can't you hear me out?  
Never give up

We all got a battle  
We all got scars  
There will always be hurt, always be pain  
But that's what makes us who we are  
We all got journeys  
Written in the stars  
Just know that you're loved and that you're enough  
And your dreams won't be that far  
We all got battles  
We all got battles

Some days, it feels like you can't live to see tomorrow  
I know, cause I've been there too  
Some days, it feels like you can only count your sorrows  
Just now that there are blessings now

Just don't look down  
Cause dreaming ain't always easy  
Can't you hear me out?  
Never give up

We all got a battle  
We all got scars  
There will always be hurt, always be pain  
But that's what makes us who we are  
We all got journeys  
Written in the stars  
Just know that you're loved and that you're enough  
And your dreams won't be that far  
We all got battles  
We all got battles  
We all got battles  
We all got battles

Just don't look down  
Loving ain't always easy  
Won't you hear me out?  
Never give up

We all got a battle  
We all got scars  
There will always be hurt, always be pain  
But that's what makes us who we are

We all got a battle  
We all got scars  
There will always be hurt, always be pain

But that's what makes us who we are  
We all got journeys  
Written in the stars  
Just know that you're loved and that you're enough  
And your dreams won't be that far  
We all got battles  
We all got battles

Some days, it feels like you could start a wildfire  
Just know the fire's inside of you
