

Stay

La'Porsha Renae

Knock down the walls, fire the candle
We watch them fall, been through it all, yeah we're still standing
You're gonna get mad, I'm gonna get mad, that's 'bout to happen
And we don't let none of that get in our way

Truth, won't always like you
But I love you always
Won't always want you
But I need you to stay
Need you to stay
Need you to stay
(Need you to stay, yeah)

Dead drop the bomb, most run for cover
But we never run, face it until down for each other
'Cause you know me and you hold me like there's no other
So we won't let none of that get in our way

Truth, won't always like you
But I love you always
Won't always want you
But I need you to stay
Need you to stay
Need you to stay

(Need you to stay, yeah)
But I need you to stay
Need you to stay
Stay with me, baby
Stay with me, boy
Need you to stay

Stay with me, baby
Stay with me, boy
Stay with me, baby
Stay with me, boy
Stay with me, baby
Stay with me, boy
Stay with me, baby
I need you to stay
