

Levitate

Låpsley

Your words cut sharp
I drown in red brake lights
Behind the cars
Turn up the volume
Air turns to vacuum
And we're on Mars

If only I was braver
If only I had words instead of letters
If only I knew better

I just want a love that makes me levitate
You said that it's natural to love and hate
But that's not how it's gonna be
(Said that it's natural)

Roll down the windows
Pull over no clue
I leave the ground
(Leave the ground)

Float into orbit
And my street feels haunted
With no sound
Street feels haunted

If only I could reach you
If only I could translate all the silence just to read you
If only I could know you
(If only I could know)

I thought I could be the one to take your pain away
I know you fight the feelings 'cause you run away
Tell me, do you want me?
(If only I could know)

(I could be the one to take your pain away)
I could be the one to take your pain away

I just want a love that makes me levitate
You said that it's natural to love and hate
But that's not how it's gonna be
(I could be the one to take your pain away
I could be the one to take your pain away)

I just want a love that makes me levitate
You said that it's natural to love and hate
But that's not how it's gonna be
(I could be the one to take your pain away
I could be the one to take your pain away)

Levitate
To love and hate
Levitate
To love and hate
