

Nightingale

Låpsley

I'll carry this light all night
I know these streets like taxi cab
Bridges over slow paced water
Green eyes like jade aurora light
I'm in your sheets like undergrad
Teach me in the darkest corner

It's you I choose, it's always been
It's me, your day, your nightingale

I'll carry this light all day
There's not a price that I won't pay
Lead us out the murky waters
Green eyes like jade aurora light
I'm in the mist fighting for life with you
Beyond the city borders

With my healing hands on your back
I write with my fingers, and I whisper
With my healing hands on your back
I write with my fingers, and I whisper
I whisper

It's you I choose, it's always been
It's me, your day, your nightingale
It's you heaven and back again
It's me, your day, your nightingale

It's you I choose, it's always been
It's me, your day, your nightingale

With my healing hands on your back
I write with my fingers, and I whisper
With my healing hands on your back
I write with my fingers, and I whisper
I whisper

It's you I choose, it's always been
It's me, your day, your nightingale
It's you, heaven, and back again
It's me, your day, your nightingale

It's you I choose, it's always been
It's me, your day, your nightingale
It's you, heaven, and back again
It's me, your day, your nightingale
