

Through It All

Lapush

Waking up to find myself beside myself the view it wasn't right
Stepping softly in-
between the things I should have said and should have done
Some people can't be pleased I guess it's you I guess it's me I
guess we'll see
I walk into the hallway that will harbor all these things until
I'm gone

I said, I want you to know
I made it through it all
I'm better but I want to see your face one more time before I l
eave and then I'm gone

Washed up on the shore where the drugs don't work and they hurt
you even more
Stuck inside a room of broken hearts that won't heal that you l
eft behind
Some people can't be pleased I guess it's you I guess it's me I
guess we'll see
So what now of my faith or is it just an exercise to limit pain
?

I said, I want you to know
I made it through it all
I made it but I can't believe all the things you said

Crawling back from the bed you made
You talk to me as if I wasn't there

Waking up to find myself beside myself the view it wasn't prett
y
Stepping softly in-
between the things I should have said and not have done
You know I can't be pleased I guess it's you I guess it's me I
guess we'll see

I fight to keep it all but stop so would you please just walk a
way and leave

I said, I want you to know
I made it through it all
I'm better but I want to see your face one more time before I l
eave and then i'm gone
