

Grow

Larry Fleet

One minute your takin' your first breath
And you're a stick on a family tree
Next minute you're takin' your first step
And Granddaddy's sayin' you're growin' like a weed
You blink and wake up in Junior High
Fall in love with a rock n' roll song
You come home tellin' your mama c'mon
I wanna grow my hair out long
Ain't that kinda how life goes
Soon as you show up here
All you do is

Grow
Like a kid into his daddy's boots
Like that corn toward the end of June
When it rains and it's John Deere green
Like your dreams when you're 16
Rollin' down freedom road
Like the love in your heart
From the first time you kiss
To the baby in her arms yeah
It don't ever stop
Man it just goes
No matter how much you've done or
How much you think you know
We all got room to grow, grow

The real world hits and you start to get
That money don't grow on trees
The bills get tall and your pride gets small
'Til you fall down on your knees
Sometimes life and love get a little bit tough
But God knows that's exactly what you need right now to

Grow
Like a kid into his daddy's boots
Like that corn toward the end of June
When it rains and it's John Deere green
Like your dreams when you're 16
Rollin' down freedom road
Like the love in your heart
From the first time you kiss
To the baby in her arms yeah
It don't ever stop
Man it just goes
No matter how much you've done or
How much you think you know
We all got room to grow
We all got room to grow

Grow
Like a kid into his daddy's boots
Like that corn toward the end of June
When it rains and it's John Deere green
Like your dreams when you're 16
Rollin' down freedom road
Like the love in your heart

From the first time you kiss
To the baby in her arms yeah
It don't ever stop
Man it just goes
No matter how much you've done or
How much you think you know
We all got room to grow
Yeah there's always room to grow
