

# Because I

Lasse Lindh

There's a little story  
of a night your star's alight  
It seems a little tired  
Maybe it was just a dream  
First time I saw into  
your eyes your eyes your eyes  
it seized me  
Like a dream I'd never dreamed before  
I'd never seen a rainbow  
closing down my rainy days  
Hate to see the shadows  
fading on my weary eyes  
You just come and  
smile again again again  
come save me  
In the glitter of a spark  
I'm waiting here  
In this moonlight on the ocean  
Don't say it's just my illusion  
Because I'll love you  
more than I need you  
Now come and to my home  
And I can get through the tides  
with you in better days  
Because I'll never let you down forever  
Can't you feel my faith  
Stay in me  
And be near  
When you're lost in paradise  
you never had  
With these lonely hands  
I'll hold your hands  
Because I'll love you more than  
I need you oh  
Can't you see my love  
Now I can get through the tides  
with you in better days  
Because I'll never let you down forever  
Can't you feel my faith  
Stay in me  
And be near  
Because I'll love you  
more than I need you oh  
Can't you see my love  
Now I can get through the tides  
with you in better days  
Because I'll never let you down forever  
Can't you feel my faith  
Stay in me  
And be near  
Because I'll pray  
Because I'm now lovin' you  
With all I am all my heart
