

Bass God

Last Dinosaurs

I'm not tryna change your life
I just wanna watch the world go by
A slice of heaven and peace of mind
But times are changing and it don't feel right

Everything's spinning
Galactic living
Earth is a giant hotel
We're living fast
'Cause nothing lasts

I've been looking to the sky
For stars to show me signs
In this interstellar ride
But I Try
Remember I'm alive
Don't worry all the time about everything
Don't worry all the time about everything

I'm tearing up my soul
Cause I'm searching for that pot of gold
Material life is all I know
A blip in time and away we go

I've been looking to the sky
For stars to show me signs

In this interstellar ride
But I Try
Remember I'm alive
Don't worry all the time about everything
Don't worry all the time about everything

If you're sad and you don't know why
Then you're not living in a western paradise
We're just winning in a losing fight
It's never perfect but we always try

I've been looking to the sky
For stars to show me signs
In this interstellar ride
But I Try
Remember I'm alive
Don't worry all the time about everything
Don't worry all the time about everything
Don't worry all the time about everything

I'm tryna change your life
I just wanna watch the world go by
