

Let You In

Lastlings

I see you when the sun comes up
I see you in the morning
I know that we can make it far
If I'm being honest, honest
Still learning how to read the signs
But I know that I've got this
And your love could take me far
Tell and I'll promise, promise

I think it's time to let you in
Hear my voice, let it guide you in
I got up when I feel you by my side
Never felt this strong, found what I've been lookin' for

Never let me go
'Cause I've come a long, long way
Lost in a foreign world
I've come a long, long way
Your love can take me further
I've come a long, long way
Your love can take me further
I've come a long, long way

(I've come a long, long way)

I think I've known you long enough
To tell when you're actin' up
Can you tell me what's on your mind?
Can you tell me what's going on?
I'm sorry for my insecurities
Sometimes they get the best of me
You know you've opened up my heart
'Cause you know how to talk to me

And you still do the same things that I fell in love with
After all these years, I can see it in your eyes
You still do the same things that I fell in love with
I could count on you, I'll feel better by your side
I think it's time to let you in
Hear my voice, let it guide you in
I got up when I feel you by my side
Never felt this strong, found what I've been lookin' for

Never let me go
'Cause I've come a long, long way
Lost in a foreign world
I've come a long, long way
Your love can take me further
I've come a long, long way
Your love can take me further
I've come a long, long way

Oh, oh, ooh
I've come a long, long way
Oh, oh, ooh
I've come a long, long way

Never let me go
Lost in a foreign world, mm
Your love can take me further
Your love can take me further
