No Time

Lastlings

I just feel vacant
I just feel wasted
I'm in control with every breath
That I'm taking
Memories fading
Feelings replaying
I should let go, it's taking ahold
I can't change this

There's no time
We're losing the light
So come on and free your mind
The way you did mine
Feels just like I wanted you
Feels just like I wanted you
This time

She could change in an instant
All her facts over fiction
I'm letting go, you'll never know
That I'm listening
Time I've been taking
To try and erase this
Gotta let go, it's under control
I can change this

There's no time
We're losing the light
So come on and free your mind
The way you did mine
Feels just like I wanted you
Feels just like I wanted you
This time

I just want to make this right
We don't want to waste the night
Every time you close your eyes
You're waiting for a sign (for a sign)
I just want to make this right
We don't want to waste the night
Every time you close your eyes
You're waiting for a sign

There's no time
We're losing the light
So come on and free your mind
The way you did mine
Feels just like I wanted you
Feels just like I wanted you
This time
