

deadstar

late night drive home

Secrets that I hope will see the light of day
Instead, I worry what people say
Ah, ah

If it was so easy for me to explain
I wanna hold that dead star
Ah, ah

Followed the dead star, and when I got there
It died already, you say that I can't hold you here
Through the dead space, I always knew
That light was just passing through
My name, what's up with you?

I've seen that dead space
I've seen the dead star
I've seen that dead space
I've seen the dead star

It's been a long way, journeying to you
I thought you were my only sun
You were the prettiest star I'd ever seen

I followed the dead star, and when I got there
It died already, you say that I can't hold you here
Through the dead space, I always knew
That light was just passing through
Oh, my name, what's up with you?

She's one of them dead stars
Is it silly that I wanted to try?
Is it? Is it?
Is it silly that I wanted to try?
Is it? Is it?
Is it silly that I wanted to try?
She's one dead star
I reach my hand up high
Is it silly that I wanted to try?
