# Blue

**LAUNDRY DAY**

And I look into the sky, sky
As I'm running through the light, light
And I'm blinded by the night, night
As I'm floating through your eyes, eyes

Everybody wanna get their name off the ground
Til' they facing a crowd with their name in the ground again
Everybody wanna a place in the crowd
Or a place in their house
Or a kid they can call a friend

Can't you see that we'd be free
With some love and empathy
Yes I know it takes some time
But we're all gonna be here for a while

And I look into the sky, sky
As I'm running through the light, light
And I'm blinded by the night, night
As I'm floating through your eyes, eyes

Everybody wanna know who they're gonna be
Take a leap and you'll see we don't need all the answers now
I feel like I could spend some years out here
I'm finally seeing clearly, I'm flying
I'm flying away

Now I can see the stars, I'm flying now
They're shining through my heart, I'm flying
Now I can see the stars
They're shining through my heart

Can't you see that we'd be free
With some love and empathy
Yes I know it takes some time
But we're all gonna be here for a while

Can't you see that we'd be free
With some love and empathy
Yes I know it takes some time
But we're all gonna be here for a while

And I look into the sky, sky
As I'm running through the light, light
And I'm blinded by the night, night
As I'm floating through your eyes, eyes
