

When It All Goes South

Laura Bell Bundy

What goes up, comes down
And you took my feet off the ground
Over the moon, I'm seeing the stars all around
And no thanks to you
When I finally land
It'll be more than I can stand

When it all goes south
I'll cry my way through the clouds
I'll spread my wings but they'll be tied and bound
If I didn't need you, just wanted you
I never would've let you
Make me feel so high

Time, space, amazing grace
You need it all to just be
Made you my gravity
Gave you the power over me
I know this is real
I can taste the pain that I'm gonna feel

When it all goes south
I'll cry my way through the clouds
I'll spread my wings but they'll be tied and bound
If I didn't need you, just wanted you
I never would've let you
Make me feel so high

I'll find my way back above when I breathe
your last breath of love

When it all goes south
I'll cry my way through the clouds
I'll spread my wings but they'll be tied and bound
If I didn't need you, just wanted you
I never would've let you
Make me feel so high
