

All Star

Laurel

Walk the summer with me
Lay me down here, I'm freezing
But no colder than that cool you've got
Crashing into my headspace
Say you like the taste of me
'Cause I'm sweeter than the other ones

Such a drunken mess, tryin' like you less
But just like you more
And one day you'll just love somebody more than me
Didn't have the time, so I was fine with it
But I've been thinking lately

If you love me, why did you leave?
If you need me, why did you go?
If you want me, why don't you see?

I thought you were an all star

Push me into that mood
Then told me that I'm in too deep
I got too much of your heart

Show me your pieces of heaven
I know it hurts you to left me
In circles around your
Seen the rough for a diamond
Said you're broken
And I just wanna save you, save you

Such a fucking mess, you think about me less
I think about you more
One day I'll love somebody more than you
Didn't have the time, so I was fine with it
But I was thinking lately

If you love me, why did you leave?
If you need me, why did you go?
If you want me, why don't you see?

I thought you were an all star

Push me into that mood
Then told me that I'm in too deep
I got too much of your heart

Don't let me go
You told me it's just me and you
And I could learn to love a cold heart
But I don't understand how

If you love me, why did you leave?
If you need me, why did you go?
If you want me, why don't you see?

I thought you were an all star

Push me into that mood
Then told me that I'm in too deep
I got too much of your heart
