# Mankind

**Laurel**

Take it slow, I don't need this
Birthday sex, you were the best
And oh babe I'll love you till your lonely
Oh babe, I'll love you till you love me
I'll love you till you love me

Take me to the pictures
Wine and dine, you're so divine
Fake love affair
You can be my keeper
But she needs to know, how you want me so

How can you live, knowing you let me fall?
You're just mankind I should have realized before

When she's out of town, you go down, down,
On me to the ground, ground
When she's out of town, town,
When she's outta, when she's outta
You go down, down on me to the ground, ground,
When she's outta town, town
When she's outta, when she's outta you go down

Take me to your lover
She turned your soul to stone
But she still doesn't know
I need you like no other
I wanna be your world
I wanna be the one

How can you live, knowing you let me fall?
You're just mankind I should have realized before

When she's out of town, you go down, down,
On me to the ground, ground
When she's out of town, town,
When she's outta, when she's outta
You go down, down on me to the ground ground,
When she's outta town, town
When she's outta, when she's outta you go down
