

# Too Far

Laurel

Clench teeth, stare at the ceiling  
I know how you feeling, baby it's alright  
I don't want you just for the season, but you left for a reason  
I couldn't see the end in sight

All star, maybe when we're older  
We can try this over  
Get a place with a view  
Or maybe we'll just get lazy  
Tell me, bitch you're just crazy  
Wish I never knew you

We've taken it too far  
Getting more than I paid for  
But when you talk like that, it's all I can believe  
And then I'm on my back  
He says "Shut up and don't speak to me"  
You've taken it too far

Been working you like a day job  
But it's too much for the payroll, if I'm being real  
He thinks I'm sweet like sugar  
But I'm sick when we gonna call it quits  
Maybe that's how I feel now

All star, maybe when we're older  
We can try this over  
Get a place with a view  
Grow me up like a flower  
In the city summer  
So I can bloom with you

We've taken it too far  
Getting more than I paid for  
But when you talk like that, it's all I can believe  
And then I'm on my back  
He says "Shut up and don't speak to me"  
You've taken it too far
