

# Wolves

Lauren Jauregui

I've been running with the wolves and I made it alright  
Searching for my purpose and I'm learning  
That we don't really get a lot of time  
So I've got to go and get mine while I'm alive  
Yeah, I'll be running with the wolves all through the night

There comes a time in every man's life when he gotta handle shit up on his own  
You can't depend on your friends when you're in a tight squeeze, everybody got problems of their own  
I gotta get it how I live  
No matter how tough it is  
Face to face with my fears  
My momma, she shed tears  
My wolves, I lost a few to the streets, they turned victim  
Bro had a daughter, all he left behind was pictures  
Life is all about decisions  
Should I stay or should I go? I'm on this mission  
I lost so many to the system  
Only two ways out  
Dead or in prison  
I know there's gotta be a better way  
Out here running with the wolves, tryna get away  
I know there's gotta be a better way  
Out here running with the wolves, tryna get away

I've been running with the wolves and I made it alright  
Searching for my purpose and I'm learning that we don't really get a lot of time  
So I've got to go and get mine while I'm alive  
Yeah, I'll be running with the wolves all through the night

Clock tickin'  
Plot and stop bitchin'  
Lot of fake stars  
But I ain't 'bout to stop wishin'  
I'ma just distance  
Me from your existence  
Every time my gut talks, I try to just listen

Conquering me, I feel I owe to myself  
I guess destiny is really just a road to myself  
I ain't got no time for back and forth, I'm movin' crucial  
Proud of my younger me, I'm telling me I knew you knew you  
I'm in Atlanta still  
Money like a Vanderbilt  
A millionaire on hamster wheels  
I'm hopin' that this can't be real  
And anything that I don't have right now  
I plan to build  
And anybody tryna shake me, bitch, I'm standing still  
I'm scraped up, got some scratches, got some war wounds  
I'm tryna reach the people as if I ain't 'bout to tour soon  
I might need a therapist, maybe a support group  
Yeah, I went from dorm rooms to courtrooms to board rooms

I've been

Running with the wolves and I made it alright  
Searchin' for my purpose and I'm learning that we don't really get a lot of  
time  
So I've got to go and get mine while I'm alive  
Yeah, I'll be running with the wolves all through the night

Running, running, we keep running, running, running  
We keep the fire in our eyes (We keep the)  
Running, running, we keep running, running, running  
We keep on heading for the sky  
Running, running, we keep running, running, running  
We keep the fire in our eyes  
Running, running, we keep running, running, running  
We keep on heading for the sky
