Champion

Lawson

When you think you can't go on
You had it all but now it's gone
Drinking from an empty glass
You won the race but finished last

Now you can see the fire burning
Revolving doors are turning
You will find a way

You go hopes and you got fears
You will live a thousand years
You're a hero underneath
You're a champion
Like volcanos you explode
You're a legend never told
Take my hand don't let it go
You're a champion

When your heart feels like a stone
The lights are on but no ones home
You got your back against the ropes
You roll the dice but can't pass go

Now you can see the fire burning
Revolving doors are turning
You will find a way

You go hopes and you got fears
You will live a thousand years
You're a hero underneath
You're a champion
Like volcanos you explode
You're a legend never told
Take my hand don't let it go
You're a champion

You're a champion (ooh)
You're a champion (ooh)

Now you can see a sliver lining
You're the bravest solider fighting
You're gonna a way
Just remember
You are not alone

You go hopes and you got fears
You will live a thousand years
You're a hero underneath
You're a champion
You go hopes and you got fears
You will live a thousand years
You're a hero underneath
You're a champion
Like volcanos you explode
You're a legend never told
Take my hand don't let it go
You're a champion

You're a champion (ooh)
You're a champion (ooh)
