

Something

Layton Greene

Baby, you've made me feel something
And I can't explain it, no
But you got that something
A vibe I ain't never had before
Always on your grind, love how you handle your business
And you hold me down every time, you the realest
I'm loving the way you got me feeling
Baby, you've made me feel something

When you come around, you make me comfortable
Comfortable
We be in a vibe, I don't even check my phone
Ever
I fuck with you 'cause you apply that pressure
I know you got me through whatever
So when it comes to you, I'll always ride

My twin flame, we're the same
You're the one I always claimed
Before the fame, yeah

Baby, you've made me feel something
And I can't explain it, no
But you got that something
A vibe I ain't never had before
Always on your grind, love how you handle your business
And you hold me down every time, you the realest
I'm loving the way you got me feeling
Baby, you've made me feel something

Free time
With you, I don't ever need me time
Never had to do much to be mine
All these other niggas get the peace sign
You know I love when you rock the boat
That Casamigos make me lose control
We got the chemistry you can't deny
I'm your Bonnie, come be my Clyde

You're my
My twin flame, we're the same
You're the one I always claimed
Before the fame, yeah

Baby, you've made me feel something
And I can't explain it, no
But you got that something
A vibe I ain't never had before
Always on your grind, love how you handle your business
And you hold me down every time, you the realest
I'm loving the way you got me feeling

Baby, you've made me feel something
And I can't explain it, no
But you got that something
A vibe I ain't never had before
Always on your grind, love how you handle your business

And you hold me down every time, you the realest
I'm loving the way you got me feeling
Baby, you've made me feel something
