

Before This War Is Over

Leah

We fight together
Ride together
We will thrive together
Before this war is over
We shall dine together
Divide this treasure
Delight forever
Before this war is over

Rain on my face
And on my enemies
As light pierces shapes in the sky
They know their fate
The end of these dark days

Don't be afraid
And don't dismay
When you hear the trumpets sound
It's time to let your voice out
Sharpen your blade
It's time to reign
And now we're gaining ground
It's time to let your voice out

We fight together
Ride together
We will thrive together
Before this war is over
We shall dine together
Divide this treasure
Delight forever
Before this war is over

Blood paints the sky
And the ground red
Your foot rests upon your victory
Their plans exposed
Who now sits upon the throne?

Don't be afraid
And don't dismay
When you hear the trumpets sound
It's time to let your voice out
Sharpen your blade
It's time to reign
And now we're gaining ground
It's time to let your voice out

We fight together
Ride together
We will thrive together
Before this war is over
We shall dine together
Divide this treasure
Delight forever
Before this war is over

Some wounds time won't heal
And now it's time to fight once more
They said "never again"
All lies (and don't forget it)
They'll slay forever
Don't reward a crime (Don't take the bribe)

We fight together
Ride together
We will thrive together
Before this war is over
We shall dine together
Divide this treasure
Delight forever
Before this war is over
