

Plugged In

Lecrae

I got a real plug
It never let me down
Always come through when I need it
Never been a drought
Told my doubters to count me in, they couldn't count me out
They tried to take me down with them, took a different route
I'm plugged in, I'm plugged in
I'm plugged in, I'm plugged in
I got a real plug
It never let me down
Always come through when I need it
Never been a drought

Woke up early Sunday, hustling all week
Cook a meal up in that studio and let my dawgs eat
Got my mind up on my mission, no time for distractions
I told my partner go pay your taxes before they come get at ya'
And plus my bro just made parole yeah, let him go yeah
Did his time up in that hole yeah, then hit the road yeah
In this industry for years, ain't never sold my soul yeah
Gave em' real estate investments instead of buying gold yeah
I told em', buy a business, get a house
Take the money, rinse it out
They put all that cheese in the trap 'cause they don't want you to get out
And you can hit your jeweler, buy your six chains or
You can start a barbershop, expanding six chains
Do it big, do it for your kids yeah
Get a crib, they don't want you free
They want you in the pin, til' yo' end, boy
That's slavery, don't play with me, I'm on my grind, right
Pay electric bills, ain't chasin' limelight, my mind right, yeah

I got a real plug
It never let me down
Always come through when I need it
Never been a drought
Told my doubters to count me in, they couldn't count me out
They tried to take me down with them, took a different route
I'm plugged in, I'm plugged in
I'm plugged in, I'm plugged in
I got a real plug
It never let me down
Always come through when I need it
Never been a drought

I got no time for no funny fool, ain't one hunnid' fool
Told my sister, "Get yo' money boo, don't let them worry you"
Had to slow down on that Hennessy, don't need no dependency'
Hard to trust these folks who say they friends, they just pretend to be
I'm on God's time, I'ma feed the block, they don't need a block
Wanna see me lock, leave me rotting in a cedar box
Made a lot of money slinging raps, bring it back
They some people jobs and got 'em out the trap, picture that
Thi'sl said he felt them bullets combs his mats, let him rap
They don't care, he came from selling crack, they tell him he's too black
Could be cooking up that re-rock on the blue flame
Or catch you slipping when you walking outta blue flag

Instead, I'm tryin' to put my partners on some new things
They mess around and give they baby momma's new names
The game will get you in the system but it never get you out
My plug come through every time and I ain't never seen a drought, yeah!

I got a real plug
It never let me down
Always come through when I need it
Never been a drought
Told my doubters to count me in, they couldn't count me out
They tried to take me down with them, took a different route
I'm plugged in, I'm plugged in
I'm plugged in, I'm plugged in
I got a real plug
It never let me down
Always come through when I need it
Never been a drought
