The One

Ledisi

I remember the days when my life was turned around
Not happy with the love I found
I needed to change and you were always here in front of me
I was running away from the love you gave me
Wanted a life but everything was crazy
Unsure of love, I needed love

Then came you, you were like the spingtime you make everything new
Just like the sun, you brought the light and now we are one

Every time it rains a little you came to cover me
You were there for me, you never left one
When I felt the world stop and my heart was breaking
You were there for me, you never left one

Now you're in my world and it keeps on spinnin'
Ain't gone change a thing cause I'm in it
Everything is beautiful because of you
How did you get here, I was dreaming?
Somebody heard me, cause I was needing you
I was wanting you, I was calling you

Then you came and everything about me has changed
Just like the sun, you brought the light and now we are one

Every time it rains a little you came to cover me
You were there for me, you never left one
When I felt the world stop and my heart was breaking
You were there for me, you never left one
You have brought me alive it's so unimaginable
And this love we share is so unexplainable
With everything I have I will give it to you because
You were there for me

Every time it rains a little you came to cover me
You were there for me, you never left one
When I felt the world stop and my heart was breaking
You were there for me, you never left one
