

# Take It Down a Backroad

Lee Kernaghan

A dozen miles, just you and me  
Made us some memories, had our fair share of ups and downs  
And lookin' back in that rear view, when all that mattered was bein' with yo  
u  
And I just wanna feel that way again

Let's take it down a backroad  
Back to where it all began  
Windows down, lettin' down your hair  
Fall and love was in the air  
Just us and that dashboard glow  
We'll be countin' every one of them lucky stars  
When we get on back to who we are  
C'mon baby, let's go  
Let's take it down a backroad  
Let's take it down, take it down  
Let's take it down a backroad

Way out where the blacktop ends  
We'll turn out on to the river bend  
And find that little spot we used to go  
You can let the world slip off your shoulders  
Slow it down and let me hold you  
And don't you want to roll back there again

Let's take it down a backroad  
Back to where it all began  
Windows down, lettin' down your hair  
Fall and love was in the air  
Take it down a backroad  
Just us and that dashboard glow  
We'll be countin' every one of them lucky stars  
When we get on back to who we are  
C'mon baby, let's go  
Let's take it down a backroad  
Let's take it down, take it down  
Let's take it down a backroad

Yeah, we can just keep drivin'  
The two of us, the two us  
We could disappear in a cloud of dust, a cloud of dust

Let's take it down a backroad  
Back to where it all began  
Windows down, lettin' down your hair  
No holdin' back and we didn't care  
Flying down a backroad  
Just us and that dashboard glow  
We'll be countin' every one of them lucky stars  
When we get on back to who we are  
C'mon baby, let's go  
Let's take it down a backroad  
Let's take it down, take it down  
Let's take it down a backroad

Let's take it down a backroad
