

Movin' On

Lee Rocker

Like a locomotive that keeps rollin' down the track
Like a bullet keeps on flyin', never turnin' back
Through the days and night time till they just rollin' away
Got to keep movin' on, never fade away

Now the dark is cold and bitter and the nights are long
Through the wicked winds of winter blow another storm
There will always be another bright, shiny day
Got to keep your coat on baby, keep the cold away

If you're feeling tired an hungry and you can't go on
You got to keep your head now baby, keep on movin' on

When it turns to autumn back in winter once again
Even though I love you, I have lost you as a friend
Even in the midnight hour searchin' for the light
You got to keep on movin', fight another fight

Bass is slappin' harder than a cannon in a war
Hearts are pumpin' harder than they ever did before
And the poison of the vipers hurt, sting and burn
You cannot know what nips at you behind you at each turn

If you're feeling tired an hungry and you can't go on
You got to keep your head now baby, keep on movin' on

Sounds of lightning, sounds of pain are echoes of the night
Lookin' across the stage, see another fight
But we keep on playin' harder, harder than before
Don't you know you're in a place you never seen before

Morning light of Sunday and the rays of hope are born
Though the road is never ending, keep on movin' on
Sunday morning the TV is on, and on and on
Got to keep your head now baby, keep on movin' on

If you're feeling tired an hungry and you can't go on
You got to keep your head now baby, keep on movin' on
You got to keep your head now baby, keep on movin' on
You got to keep your head now baby, keep on movin' on
