

Chemistry

Left Boy

I've been on a roll
Such a pretty face, baby, can I take it all to-go?
Long sex on an island beach sip it, sip it slow, yeah
I want it all, want it all, yeah, you already know
Yeah, she already know

That you fucks with me
We've got some chemistry
Let me be the one
That gives you what you need
(I already) Know that you fucks with me
We've got some chemistry
Let me be the one
That gives you what you need

I-I think this might-might be the moment that I've been waiting for
You and me in the hotel lobby, baby, we ain't got no explaining to do
Let me make you "Oh-oh", I can get it right
We can do what you want, tell me what you like (like, like)

I've been on a roll
Such a pretty face, baby, can I take it all to-go?
Long sex on an island beach sip it, sip it slow, yeah
I want it all, want it all, yeah, you already know
Yeah, she already know

That you fucks with me
We've got some chemistry
Let me be the one
That gives you what you need
(I already) Know that you fucks with me
We've got some chemistry
Let me be the one
That gives you what you need

You the only one that keep me sane
You the only one that keep me down at the ground
And I know it ain't supposed to be that way
You say you ain't my momma
Yeah, I know you ain't my momma
But I got so much trouble in the brain, what?
You think that I gotta see a therapist, huh?
Is it really that bad?
You looking real sad
I try and keep the mood light
But you don't want it like that
She says, "Tell it like it is, tell her like it is
The kids are getting old, the money gonna come
Don't you worry 'bout yourself
You're not the only one, you're not the only one, one
That's living in a dream, in a dream
It ain't always like it seems, you always in between
You never do it all
You're a fucking asshole, and you already know"
You need to get back on track
Everything you wrote down, you need to do all that, all that?
Everything you talk 'bout's all smack

I don't wanna hear another word, man fall back
