You got my number?  
Yes I do  
After hours the stories I listen to  
And you're cool and all and you're nice and shit  
And your personality's a fucking number one hit so  
Just come along with me  
Let's have a dance on the new york street  
I'll hold your hand while we step to the beat  
By the end of the street  
You'll be in love with me  
No I won't ok alright then don't  
Do what you want  
Have a safe trip home  
I'm out and gone  
You'll die alone  
That's what she said when I talked to Symone  
Ok cockblockin not cool stop it  
Marie didn't care so we move unlock it  
Down in the stall and she shows me her tits  
With her tounge down my mouth and I'm rubbing her clit  
I'm loving this shit

Lord forgive me my sins  
Cause all I want to do is win  
And get in  
I mean occasionally like  
The occasion is right  
So I'll pull down your tights and  
It's round one fight  
Jesus son of God every time I drink your blood  
End up feeling up a girl in the night club  
It's all right look I'm standing in the light  
Of the strobe with the love bite glowing in the dark  
I'll take her to the park  
Kissin in the grass  
And she grinning like a shark  
While I'm touching up her ass

Top notch first class  
Everything about you  
Make me never want to spend another night without you  
I don't care what your name is or where you're from  
I'm drinking too much shit to stick to one  
I'm looking for the young fun hot chicks with the smile  
Ready to get fucked up and make a dawg pop

Why don't you come home with me?  
I just wanna know who you are  
Lord forgive me my sins
