

ROVER

Left Boy

Baby if I take the rover, it's over
Supernova on the highway, I fly away
'Cause I just got the turbo, oh no
And the speaker's goin' wa wa

Oh I love your sound, I never get enough
I miss you when you're not around, I admit it's tough
I found myself shaking in the night
Oh, I miss you babe, can we take a ride, tonight?

I put the key in the ignition, I'm smiling, let's get violent
I got no place to be, my phone's on silent
I turn the engine on, I hear the motor go
I love her very much, don't take it personal

Burning up, gasoline running through your veins
Baby, you can turn it up
So damn loud that I can't hear the music play
I can't hear the music play, get so emotional anyway, yeah

You and me gon' be okay
I don't wanna hear what they gotta say, yeah
I'm vibing to that all day, I gotta go, can't stay
When you coming back, can't say
When you living this life, that's the price that you gotta pay

I put the key in the ignition, I'm smiling
Let's get violent
I got no place to be
My phone's on silent
I turn the engine on I hear the motor go I love her very much
Don't take it personal
