Leftfield

I have a question  
Can I takeover our creation of love  
Gimme your attention  
And give me all of your trust  
Let me show you all of me  
And additions to me  
Rhythm's the strength to our love  
So follow baby carefully and I'll be  
Everything you want in me and you'll see  
What we've been waiting for

Please touch me like this (baby, do it like this)  
Please hold me like this (hold me)  
Please love me like this (it makes me feel so good)  
I need you like this

If we goin' start touching each other  
We goin' do it like this  
I'll tell you where to kiss  
And you'll begin to kiss  
Baby I know how I feel  
So just follow my lead  
Don't be afraid, you're at the wheel  
And I just wanna ride and enjoy it with you  
'Cause I know that you'll enjoy everything that I do  
Relax and I'll show you

Bridge  
You plan to be with me  
Baby it's alright  
Just do right  
Let's just be clear on some things  
This is all for you  
But there are rules  
If you wanna celebrate me  
And if you wanna keep me pleased  
This is how my love has got to be  
So please touch me
