Years of Coldness

Legenda Aurea

This is the great final fight of gods and beasts
When they stand face to face
When honour and force awakes
A war of different races
Everyone will see
And no one will forget this moment
When everything collapses

Three years of dying
Three years of coldness
All the lights died out
All the blossoms withered
Three years of dying
Three years of coldness

The wolf and the snake were unfettered
And Odin is defeated
Death devours life
The world goes up in smoke
And only dust is left
And no one will forget this moment
Only when the dust is left

Three years of dying
Three years of coldness
All the lights died out
All the blossoms withered
Three years of dying
Three years of coldness

This is the great final fight
When honour and force awakes

Three years of dying
Three years of coldness
All the lights died out
All the blossoms withered
Three years of dying
Three years of coldness
