

Contamination

Legion of the Damned

(I will enjoy killing one person every day)

Viral outbreak lethal threat awakening
Places untouched by human hands unveil this hidden death

Vomiting blood innards dissolve
Death in excruciating ways
Highly contagious rapidly spread
Global rise of infections

Fatal breath organs fail contagion
These fresh new hosts to feast upon bodies bleeding from within

Death toll rising infection rates soar
States resort to desperate measures
Ruthless restrictions enforced expulsions
In a vain attempt at containment

Killing mankind this humanicide none will survive
Contamination

Collapse of daily life piling dead
Disconcerting rate of multiplication
Locked down in isolation resources running low
The unseen (contagious) killer walks among us

Killing mankind this humanicide none will survive
Contamination
Killing mankind this humanicide none will survive
Contamination

Man looks at science attempts to find
The cure against mass extinction
Death has come to kill god's lowly creature
Falling prey to this plague panic takes hold
In the face of remorseless eradication

Killing mankind this humanicide none will survive
Contamination
Killing mankind this humanicide none will survive
Contamination
Killing mankind this humanicide none will survive
Contamination

Pestilential gift the omega
The reward of human expansion
Few will survive withdrawn in isolation
After the great eradication
