

Last Command

Legion of the Damned

Face scarred in battle - trial by ordeals
Courageous under fire - warrior revealed
Fight for glory - or perish in death
Command is given - there's no way back

Under silver wings
Comes death in the night
Descending from the skies
In soundless flight
Crawling out
Of the belly of the dragon
Rattling devices
Spit an iron hail
Raiding the den
Of the adversaries
Capture of the black legion's head
120 Days of sodom are born
No regret for those tortured and dead

Feel the heart of the tiger, pounding in your chest
The fierce force that fuels, the burning beast inside
Steel helmet gracing a body of spartan strenght
Under the wings of victory, the commands must be obeyed

Legions reborn
Eternal ordeal
Submission or death
Sacrifice through steel

Divine destiny, manifests itself in war
Legions are reborn, baptized on many fronts-
Once dormant atavism, call of the one eyed God
Thundering through skies, blood sacrifice through steel

Legions reborn
Eternal ordeal
Submission or death
Sacrifice through steel
Under silver wings
Comes death in the night
Descending from the skies
In soundless flight
120 Days of sodom are born
No regret for those tortured and dead

Last command - fight till death
Last command - until the end

Wild hunt of stern warriors disturb the clouded nights-
Lightning bursts from iron mouths, relentless demons roars
Wolves on the prowl, all is covered in darkness
We indulge in this eternal fight to equalize the store

Legions reborn
Eternal ordeal
Submission or death
Sacrifice through steel

Last command - fight till death
Last command - until the end

Under silver wings
Comes death in the night
Descending from the skies
In soundless flight
120 Days of sodom are born
No regret for those tortured and dead

The age of Kali Yuga, sucking all into decay
Life an eternal ordeal, submission or to die
Infernal command, desolation comes our way
From the berserkers throat, sound nocturnal cries

Legions reborn
Eternal ordeal
Submission or death
Sacrifice through steel
