

Better Now

Lemâitre

Been through worse times, I've been through bad times too
I can imagine worse shit that's gonna happen to us
Now, is it worth it? I lost my job, I can sell my soul
I'm on fire and I'm gonna make it work 'cause

It's better now, better now
It's all better now
Better now, better now
It's better now, better now
It's all better now
Better now, better now

With all this good shit I should be more grateful
But I can imagine the best is yet to happen to us
These expectations, I can have them, they will ruin my day
But right now I'm in the moment and it feels like

It's better now, better now
It's all better now
Better now, better now
It's better now, better now
It's all better now
Better now, better now

The worst things is gonna happen to us
I just wanna get up
Am I asking too much?
It's better now, it's better now
Can't get much better now
Can't get better now, can't get better now
Am I asking too much?
