

Care

Lemâitre

When the party's over
All I care about is you
When my head falls on my pillow
All I care about is you

I came out tonight
Just to see you again
I think we locked eyes
Or is this all in my head

Come closer to me
Baby take my hand
I'll be waiting for you
But for now I'm just dancing by myself

When the party's over
All I care about is you
When my head falls on my pillow
All I dream about is you
When the noise goes quiet
The voice in my head sounds like you
It's speaking to me softly
Saying all I care about is you

When the party's over
All I care about is you
When my head falls on my pillow
All I dream about is you

When the noise goes quiet
The voice in my head sounds like you
It's speaking to me softly
Saying all I care about is you

About is you... [repeats]

When the party's over
All I care about is you
When my head falls on my pillow
All I dream about is you
When the noise goes quiet
The voice in my head sounds like you
It's speaking to me softly
Saying all I care about is you

About is you... [repeats]
