

Tree House

Lemâitre

There's a place in my heart where no ones allowed
Somewhere in the deepest and darkest corner
If you trust me enough, I'll show you around
Somewhere we can be alone

We can stay for the night and never go home
Make our way through the storm and never let go
Only after the rain a flower can grow
Somewhere we can be alone

We can run through the dark where no one sees us
Way down at the foot of a lonely mountain
There a tree that I know, we can climb to the top
Where it feels like we're alone

We can stay for the night and never go home
Make our way through the storm and never let go
Only after the rain a flower can grow
Somewhere we can be alone

We can stay for the night and never go home
Make our way through the storm and never let go
Only after the rain a flower can grow
Somewhere we can be alone

Cause no one makes me feel this way but you
Only one I trust to see the view
Cause no one makes me feel this way but you

Where we can be alone
We can stay for the night and never go home
Make our way through the storm and never let go
Only after the rain a flower can grow
Somewhere we can be alone
Where we can be alone
We can stay for the night and never go home
Make our way through the storm and never let go
Only after the rain a flower can grow
