

# Take Care

Lemar

It was never gonna work out  
I can see that you were meant for each other  
I couldn't ever hear me say it out loud  
You're better for her than I am  
I guess I should have paid her more attention  
I was never good between the lines  
All she needed was my love and affection  
It's too bad, now I ran out of time  
So take care of my love

You live you learn  
You crash, you burn  
But whatever you do don't let go of her hand  
You cry sometimes  
Add fuel to the fire  
It could be so easy  
Just, never do what I did  
Take care of my love

You were never one to scream it out  
I should have noticed I was killing you softly  
Now you look happier without a doubt  
I can see that your heart's safe forever  
So take care of my love

You live you learn  
You crash, you burn  
But whatever you do don't let go of her hand  
You cry sometimes  
Add fuel to the fire  
It could be so easy  
Just, never do what I did  
Please, take care of my love

I'd take it all back if  
Begging for forgiveness  
Would somehow, break these clouds  
Make true all my promises  
I've pushed it too far  
You're better off where you are

You live you learn  
You crash, you burn  
But whatever you do don't let go of her hand  
You cry sometimes  
Add fuel to the fire  
It could be so easy  
Just, never do what I did

Now he's holding you every night  
Kissing your face every morning  
Oh, take care of my love  
I used to be the shoulder you lean on  
Now he's the rock that you run to  
Ooo, just take care of my love
