Hearts Brighter

Lenka

You could spread your wings wide
And you could take to the skies
And maybe you would fall down
But it would be the best ride
You could take the deep plunge dive into the depths of
Anybody's ocean 'cause everybody wants one

Hearts wider than
Hearts stronger than
Hearts wiser than
Anything you ever thought you would be fighting for
Hearts bigger than
Hearts bolder than
Hearts brighter than
Anything you ever thought you would be fighting for
Anything you ever thought you would be fighting for

We could take the long road
And we could let it go slow
Open up a window take a breath turn a page over
'Cause you've been trying so hard
Living with a bruised heart
But maybe you should let it open up a little
'Cause baby it's the best part

Hearts wider than
Hearts stronger than
Hearts wiser than
Anything you ever thought you would be fighting for
Hearts bigger than
Hearts bolder than
Hearts brighter than
Anything you ever thought you would be fighting for

It grew a little every chance you took
It grew a little every stand you stood
It took a little but you knew it would
Our hearts are brighter than we ever knew
It grew a little every chance you took
It grew a little every stand you stood
It took a little but you knew it would
Our hearts are brighter than we ever knew

Hearts wider than
Hearts stronger than
Hearts wiser than
Anything you ever thought you would be fighting for
Hearts bigger than
Hearts bolder than
Hearts brighter than
Anything you ever thought you would be fighting for
Anything you ever thought you would be fighting for

So hold your heart open open and be ready for a little more
It's everything we ever thought we would be fighting for
It's everything we ever thought we would be fighting for
So hold your heart open open and be ready for a little more

It's everything we ever thought we would be fighting for
It's everything we ever thought we would be fighting for
So hold your heart open open and be ready for a little more
