

Little Love

Lenka

Can you gimme just a little taste of your love?
I wanna float up into outer space, I wanna look down from above
See exactly how the world looks when I have

A little love
A little of your love
(Just a little love) a little love

Can you take me to a hideaway that you know?
I wanna take a little holiday, I wanna be part of the show
About the way it feels to have

A little love
A little of your love
A little love
A little of your love
(Just a little love) a little love
A little of your love

Sometimes it gets a little much
I guess I've got a little crush
But I wanna know, I wanna know
How it feels
I know it's inappropriate
I probably shouldn't go for it
But I wanna know, I wanna know
How it feels

To have a little love
A little of your love
A little love

Can you gimme just a little taste of your love?
I wanna float up into outer space, I wanna look down from above
See exactly how the world looks when I have

A little love
A little of your love
(Just a little love) a little love
A little of your love
(Just a little love) a little love
A little of your love
(Just a little love) a little love
(Sometimes it gets a little much)
A little of your love
(I guess I've got a little crush)
A little love
(But I wanna know, I wanna know)
A little of your love
(How it feels)
(A little love) a little love
(I know it's inappropriate)
A little of your love
(I probably shouldn't go for it)
A little love
(But I wanna know I wanna know)
A little of your love

To have a little love
