

# Ultraviolet

Lenka

Eyes open in the dead of night  
Four walls and a yellow light  
And I know this heart is beating too slow  
Can't dream enough to make it right  
So I woke up and I realised  
That I know the answer is so close

I want the peaks and valleys, I'll take the highs and lows  
Show me the spectrum as a whole

I'll live my life in ultraviolet  
I'm holding out for ultraviolet  
Won't stop for less than ultraviolet  
I'll live my life in ultraviolet

You take on every fight  
Pick apart what's wrong or right  
And you know you've never been so low  
No colour in your crying eyes  
Never feeling satisfied  
But I know, I know that I'll never let it fade...

I'll live my life in ultraviolet  
I'm holding out for ultraviolet  
Won't stop for less than ultraviolet  
I'll live my life in ultraviolet

I'll live my life in ultraviolet  
(It radiates inside me)  
I'll live my life in ultraviolet  
(Electromagnetic)

The grey don't satisfy me, can't feel the frequency  
Stuck in a holding pattern, not where I'm meant to be  
I want the peaks and valleys, I'll take the highs and lows  
Show me the spectrum as a, more than the spectrum as a whole

I'm holding out for ultraviolet  
I'll live my life  
I'll live my life (Ultraviolet)  
I'll live my life (Ultraviolet)  
I'll live my life
