

I would not bother about the other side of town  
But you're so far away your brothers feelin' down  
Did you know that I kept calling  
Did you know that I kept calling all along?

And you can see what you're going to be  
Yeah you can see what you're going to be  
And you can't get my attention, 'cause I'm sure you know the ending  
And can take the world apart

All the things we had together  
And all the things we've lost has been found for sure  
And I'd be waiting here forever  
And this is all, this is all, this is all for good

My friends are not coming home tonight  
And I can't sleep, I am  
Only waiting for the morning  
This is why I'm calling all along

And you can see what you're going to be  
Yeah you can see what you're going to be  
And you can't get my attention cause I'm sure you know the ending  
And could take the world apart

All the things we had together  
And all the things we've lost has been found for sure for sure  
And I'd be waiting here forever  
And this is all, this is all, this is all for good

All the things we had together  
And all the things we've lost has been found for sure for sure  
And I'd be waiting here forever  
And this is all, this is all, this is all for
