

Tinnitus

Leoniden

If we go a million miles ahead
Still suffering the dark side to the equation
And if I walk far away from here
Melody of voices never heard
Can't you see there's no explanation?
There's a cause, there are reasons
But no explanation
Nothing to mend those broken whys
Nothing to mend those broken whys

All those years, I'm getting drowned in holding it together
So I'm holding it together till the lights go out

All those years, I'm getting drowned in holding it together
So I'm holding it together till the lights go out
All those years, I'm getting drowned in holding it together
So I'm holding it together till the lights go out

If we go a million miles ahead
Still suffering the dark side to the equation (Dark side)
And if I walk far away from here, oh
Melody of voices never heard (Voices)
Melody of voices never heard

All those years, I'm getting drowned in holding it together
So I'm holding it together till the lights go out
All those years, I'm getting drowned in holding it together
So I'm holding it together till the lights go out

I caught a glimpse through the crack in the fabric
I saw the wrongs of the past in the present
Repeat, repeat, repeat
A chorus that never leaves
And I caught a glimpse through the crack in the notebook
I saw the wrongs of the past in the new songs
We repeat, repeat, repeat
A chorus that never leaves

And I caught a glimpse through the crack in the fabric
I saw the wrongs of the past in the present
We repeat, repeat, repeat
A chorus that never leaves
And I caught a glimpse through the crack in the notebook
I saw the wrongs of the past in the new songs

All those years, I'm getting drowned in holding it together
So I'm holding it together till the lights go out
